SARAVANA KUMAR M

REACT DEVELOPER | FULL-STACK DEVELOPER

Tiruchirappalli, Tamil Nadu | +91 9566571253 | saravanakumarmurugesan3@gmail.com | LinkedIn Profile

PROFESSIONAL SUMMARY

React Developer / Full-Stack Developer with 3 years of experience building responsive web applications and RESTful services. Skilled in React.js, JavaScript, TypeScript, Redux, Node.js, Express.js, and SQL databases. Experienced in role-based application workflows, JWT authentication, API integration, and secure document handling. Focused on maintainable components, reliable backend contracts, and user-friendly interfaces.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, Redux, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
Database & Storage: MySQL, PostgreSQL, Cloudflare R2
Tools & Deployment: Git, GitHub, VS Code, Postman, Vercel, Render, Neon (PostgreSQL)
Core Concepts: Component-Based Architecture, State Management, Role-Based Access Control, Responsive Design, API Integration

PROFESSIONAL EXPERIENCE

Axcen Innovation Lab Pvt. Ltd. — Tiruchirappalli, Tamil Nadu

React Developer / Full-Stack Developer | October 2023 – Present

- Develop and maintain responsive web applications using React.js, TypeScript, Redux, and reusable component patterns.
- Build and integrate RESTful APIs with Node.js and Express.js to support frontend workflows and backend business logic.
- Implement application state management, protected routes, and role-based user experiences across complex workflows.
- Collaborate with Git/GitHub version control and test API behavior using Postman; support application deployment through Vercel and Render.

SELECTED PROJECTS

MedHire – Healthcare Recruitment Platform

React.js · Node.js · Express.js · PostgreSQL · JWT · Cloudflare R2

- Developed recruitment-platform workflows spanning candidate onboarding, profile management, resume handling, and job applications.
- Implemented JWT-authenticated API flows and integrated the React frontend with Node.js/Express backend endpoints.
- Built resume upload handling using multipart form data; stored resume files in private Cloudflare R2 storage and maintained related metadata in PostgreSQL.
- Worked on recruiter/hospital profile API contract handling to map supported profile fields and keep frontend-backend data structures aligned.

CVhaven – Job Matching Platform

React.js · TypeScript · Redux · Node.js · MySQL

- Built role-based job-platform features with React.js and TypeScript, using Redux for shared application state.
- Implemented a dynamic CV builder with category-based profile management and privacy-aware contact disclosure.
- Developed employer profile search and filtering, payment-gateway integration, and automated email notification triggers.
- Created admin functionality for user management, pricing configuration, transaction history, and platform settings.

Healthcare Management System

React.js · Node.js · MySQL

- Developed a multi-role single-page application for administrators, hospital owners, doctors, and patients with protected routes.
- Implemented JWT-based authentication, appointment booking, billing, and staff-management interfaces.
- Built RESTful backend functionality and MySQL queries supporting reporting and analytics dashboards.

EDUCATION

Master of Computer Applications (MCA) | 2023 | CGPA: 8.2
Bishop Heber College, Tiruchirappalli

Bachelor of Computer Applications (BCA) | 2021 | CGPA: 7.8
National College, Tiruchirappalli

ACHIEVEMENTS

- Won 1st place in the “ADS_UP” competition at inter- and intra-college symposiums, Jamal Mohamed College.
- Won 1st place in the “TRIANGULAR CODE” programming competition at inter- and intra-college symposiums, M.A.M. College of Engineering.
